

# Jonathan Kim

Buena Park, CA 90621 - (951) 233-0898 - whkim94@gmail.com

## Professional Summary

Experienced Full Stack Developer with 5+ years of expertise in Python, JavaScript, and TypeScript. Proven track record in implementing scalable solutions using modern frameworks like Django, React, and Vue.js. Skilled in cloud technologies, CI/CD, and performance optimization. Collaborative team player adept at leading projects and mentoring junior developers.

## Education

**University Of California, Davis** - Davis, CA

**Bachelor of Science:** Computer Science, 12/2017

## Skills

**Language:** Python, Javascript, Typescript, PHP

**Framework:** Django, FastAPI, Vue.js, Nuxt.js, React.js, Next.js, Laravel, Node.js

**Cloud & DevOps:** AWS (ECS, EC2, S3), Docker, CI/CD (GitHub Actions, GitLab CI/CD)

**Tools:** Cursor, OpenAI, Claude, Docker, Twilio, Figma

## Work History

**Full Stack Developer**, 08/2024 to 04/2025

**Global Fashion Resource Inc** - Los Angeles, CA

- Managed migration from legacy Microsoft Access-based system to modern ERP solution using **Vue.js** and **PHP/Laravel**, modernizing company-wide operations
- Architected and implemented new database schema to accommodate complex legacy data structures, ensuring data integrity during migration
- Developed custom data transformation scripts to clean and normalize historical data, resolving inconsistencies in legacy datasets
- Created intuitive interfaces for Sales/Purchase Orders, Inventory Management, and Financial Reporting modules, significantly improving user workflow efficiency
- Implemented robust data validation and error handling to prevent data inconsistencies that existed in the legacy system
- Established automated testing protocols to ensure system reliability during continuous deployment
- Provided training and documentation to facilitate user adoption of the new ERP system

**Senior Full Stack Developer (Ind. Contractor)**, 01/2023 to 07/2024

**Interfit Worldwide Inc** - Irvine, CA

- Modernized backend to **Python/Django**, improving scalability and maintainability.
- Upgraded frontend to **TypeScript/React.js/Next.js**, resulting in a 30% improvement in page load times.
- Implemented microservices architecture using AWS ECS, enhancing system modularity and reducing deployment times by 40%.
- Established CI/CD pipeline with GitHub Actions, reducing deployment errors by 60%.
- Optimized Google SEO strategies, boosting daily organic traffic by 50%.
- Containerized development and production environments using Docker Compose, ensuring consistency across team members.

**Frontend Developer**, 05/2021 to 01/2023  
**BASF** - San Diego, CA

- Oversaw full-cycle process, from designing layouts using Figma to building projects with **Typescript/Vue.js/Nuxt.js**.
- Enhanced **Python/FastAPI** backend and streamlined deployment using Docker and GitLab CI/CD.
- Implemented and optimized **Neo4j** graph database to streamline laboratory process workflows, resulting in improved data visualization and enhanced application network efficiency.
- Developed custom lab tools using Vue.js, increasing scientist productivity by an estimated 20%
- Introduced Test-Driven Development (TDD) using Jest, improving code quality and reducing bugs in production by 30%.

**Fullstack Developer**, 09/2019 to 09/2021  
**Interfit Worldwide Inc** - Irvine, CA

- Architected and developed a full-stack **Python/Django** web application from the ground up.
- Integrated **Twilio's** Video and Voice APIs to implement bi-directional conferencing, a key feature that drove 40% of user engagement.
- Designed and implemented a scalable infrastructure on AWS ECS, capable of handling 1000+ concurrent users.
- Optimized application performance by implementing caching strategies and database query optimizations, reducing average response time by 60%.
- Configured scheduled tasks using **Python/Django** Celery and AWS Cluster Scheduler.
- Introduced real-time chat functionality using Django Channels and Socket.io, increasing user interaction time by 25%.
